Summary

DevOps engineer focused on Linux, virtualization platforms (including but not limited to AWS), automatization of software integration and delivery process (Jenkins, Docker) and managing infrastructure as a code (Ansible, Chef, basics of Puppet).

In possession of an Australian visa allowing to get a full time job - open to job opportunities. Ready to start work in Australia in 3 weeks (2 weeks of the period of notice and 1 week for relocation).

Experience

2015–still   **DevOps Engineer**, *SoftServe*, Wroclaw (Poland).
Developing CI & CD pipelines on AWS infrastructure for web services. Used technologies:
- Amazon Web Services (AWS) stack: CloudFormation, Elastic Compute Cloud (EC2), EC2 Container Service (ECS), Relational Database Service (RDS), Auto Scaling, Virtual Private Cloud (VPC), Simple Storage Service (S3), Simple Email Service (SES) and other.
- Docker.
- Chef.
- Jenkins.

2013–2015   **Software Integration Engineer (SCM)**, *Nokia / Nokia Solutions and Networks*, Wroclaw (Poland).
Technical leader for DevOps/SysAdmin teams responsible for two projects.
- Administration of physical (HP Server Hardware, NetApp) and virtualised (in Eucalyptus & S3 (compatible with Amazon Web Services (AWS)), Citrix XenServer and VMware vSphere technologies) servers and storages.
- Administration of RHEL and Debian based Linux systems, including usage of tools for automated management like Ansible.
- Scripting in Bash and Python.
- Developing and optimizing continous integration flows (Jenkins, SVN, GIT) and release processes of C/C++ and Java projects.
- Quality assurance - analysis using SonarQube and tools for C/C++, preparation for TL9000 audit.
- Supporting developers and testers in their daily activities.
- Taking over a project from other company, responsible for both competence and infrastructure transfer.

2012   **OSS Technical Support – internship**, *Nokia Siemens Networks*, Wroclaw (Poland).
Local laboratory administration, basic configuration and verification of OSS systems.

Miscellaneous

2011–still   **Administration of own web page and discussion forum**.

Education

2013–2015   **Master's degree**, *Wroclaw University of Technology*.
Telecommunication — Mobile Networks.

2009–2013	**Bachelor's degree**, *Wroclaw University of Technology*.
	Electronics and Telecommunication — Information and Communication Networks.

Languages

english	professional working proficiency	*IELTS*
polish	native	

Skills

administration	Linux (RHEL and Debian based distributions, CoreOS).
scripting	Bash, Python (including libraries like Flask and SQLAlchemy).
CVS	Subversion, GIT.
CM	Ansible, Chef, basics of Puppet.
CI	Jenkins.
code analysis	SonarQube and related tools.
virtualization and cloud computing	○ Amazon Web Services (AWS), Eucalyptus. ○ Citrix XenServer. ○ VMware vSphere. ○ Docker, Vagrant.
networking	Practical understanding of TCP/IP networks, configuring network elements, troubleshooting.
project management tools	Redmine, JIRA.
programming	Basics of C++.
databases	Basics of SQL and PL/SQL.

Trainings and certifications

embedded	Designing Embedded Systems with Yocto (Doulos).
networking	Cisco Certified Network Associate.
english	IELTS general training certification (C1).

Other

○ Driving licence.

Interests

○ Scorpiones (Animalia, Arachnida).
○ Snooker.
○ Space exploration.
